NEW PREVIEW

LOGIQ3CHAM

Expanded Line with New Counterboring Heads.

Highlights

New LOGIQ-3-CHAM Geometry Assures Stable Performance and High Productivity on All Material Types.

- The new F3B counterboring heads can be mounted on any LOGIQ-3-CHAM tool in the appropriate pocket size.
- 3 effective cutting edges, enable increased productivity.
- The new F3B design enables diverse counterboring applications with a wide ratio of pre-holes to required holes.
- Combines the productivity advantages of the LOGIQ-3-CHAM line with excellent counterboring capabilities while maintaining extremely good hole straightness even when machining non-centered pre-holes.
- Due to its unique design, LOGIQ-3-CHAM can be used on any type of machine regardless of its power, specifically on lathes and Swiss-Type machines.
