NEW PREVIEW

SUMOCHAM MULTI-MASTER

Modular SUMOCHAM Drill with a Multi-Master Connection.

Highlights

New Modular SUMOCHAM Drills with a Multi-Master Connection for Easy Adaptation and Setup.

ISCAR introduces a new drill line based on the successful SUMOCHAM Family.

The new tools feature straight flutes and a Multi-Master connection for easy adaptation and adjustment on diverse machines and for different applications. The modular SUMOCHAM drill with a Multi-Master connection is designed to provide an easy and quick change not only for drill heads, but for drill bodies as well, making it a versatile tool for drilling applications. Additionally, the modular design allows customization and flexibility in terms of length and diameter.

Features

The tools can be mounted on a large variety of standard MULTI-MASTER shanks and adaptors.

- NO SETUP time for drilling tools and for drilling heads.
- Internal coolant.

The new SUMOCHAM / Multi-Master drill can mount any of the SUMOCHAM drilling heads intended for different applications and for all types of materials such as: ICP, ICK, ICM, ICN, FCP, ICG, HCP, QCP and more.
