NEW PREVIEW

QUICK T LOCK

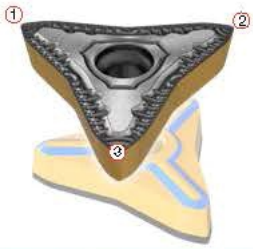

New 3 Positive Cutting Edge Insert with Safety Lock Clamp, Suitable for Diverse Turning Directions, for Extremely High Productivity.

Highlights

Introducing a New Diverse Multi-Directional Turning Insert, with 3 Positive Cutting Edges and a Safety Pocket Design for Very High Feed in Back-Turning.

Features

- Improved productivity: The QUICK-T-LOCK system enables multi-directional front turning, back turning, profiling and face turning that feature outstanding productivity which can be achieved with one tool.
- Unique clamping design: Features a screw lock tool with 3 bottom ridges that ensure a fixed location and high stability for machining at very high feed rate.
- Advanced chip-formers: The new QUICK-T-LOCK family, designed with advanced, efficient and dedicated chip-formers for high feeds specifically for backworking machining.
- Insert grades: The inserts are available with ISCAR's renowned grades for ISO-P and ISO M materials.
